

How to measure your finger size....

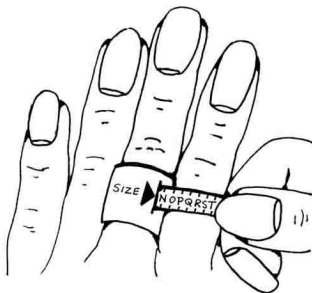

①

Following the dotted lines, cut out one of the finger sizers at the bottom of the page and cut a slit along the dotted line next to the ►

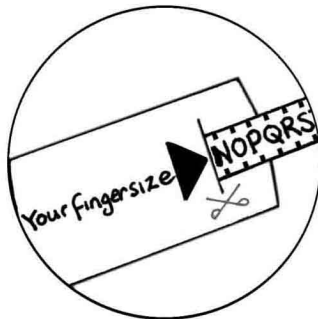

②

Push the pointed end through the slit from behind, as shown in the diagram.

③

Slip onto the finger to be measured and adjust to fit comfortably. Ensure the gauge slips over the knuckle without difficulty.

④

Read off your size specified by the arrow - in this example size 'N' is shown. (Note: The sizes given by the numbers beyond size 'Z' indicate the size 'Z+1'...'Z+12').

If you have trouble with our print out ring sizer then please use our contact page to request a sturdy plastic ring sizer.
